

## Testimonials

*"CCSE was an invaluable member of our solar project team. Their professionalism and dedication to us as a customer was exceptional. We're confident that without CCSE's counsel and support the results of our project would not have been so favorable."*

**- Allen Carlisle, Padre Dam Municipal Water District**

*With ever-increasing costs, the most obvious reason to conduct an energy audit is to save money. Yet, a well-designed energy plan also improves human comfort and moves us toward a sustainable future.*

*"CCSE's unbiased, objective and professional energy advisory services ensure that my clients understand how solar will impact their utility costs and, most importantly, that my clients' solar projects are appropriately scoped and sized to generate optimal energy cost-savings."*

**-Sophie Akins, Best Best & Krieger**

*"I truly believe that CCSE's assistance and dedication has moved the San Diego Convention Center closer to our sustainable energy goals and for that I am grateful."*

**- Brad Gessner, San Diego Convention Center Corp.**

**Energy Advisory Service**  
*We are the energy experts,  
so you don't have to be.*

*The California Center for Sustainable Energy is a nonprofit corporation based in San Diego that helps business, individuals and municipalities adopt greener practices and save energy and money through rebates, technical assistance and education.*

At CCSE, we are uniquely experienced in providing high-quality expertise to customers interested in learning more about energy efficiency, renewable energy, green building and carbon management. We manage and participate in a variety of ratepayer-funded state incentive and education programs that provide a way for clean, green emerging and established technologies to expand their reach.

We can help you identify opportunities to reduce energy loss and optimize performance and show you how your business can achieve significant savings and improve operations through an integrated approach.

CCSE has a well-established staff of accredited engineers, energy raters and technical specialists who are highly qualified to help with energy efficiency, renewable energy, energy auditing, carbon impacts, green building and other clean energy technologies.

## Energy Advisory Service

The key is finding a *balance* of energy efficiency, renewable energy and utility rate choices that matches *business goals* and expected return on *investments*.

Working with all sectors of the community, we deliver *accurate* energy-related information with a high level of *integrity* and *transparency* that saves both energy and money.
