---

## What is SASH?

A rebate program for qualified homeowners that is administered by GRID Alternatives

- Free 1kW systems for families earning <50% AMI
- Rebates of \$4.75 - \$7.00 per watt for families between 50-80% AMI

## PU Code 2852?

*The residence must be P.U. Code 2852-compliant, defined as:*

- 1) A single family residence that is part of a two or more unit development project;
- 2) where 20% of the homes are sold to lower income households (as defined in Health and Safety Code Section 50079.5); and
- 3) those units targeted for lower-income households are subject to a deed restriction or covenant with a public entity – ensuring that the units will be available at an affordable housing cost (as defined in Health and Safety Code Section 50052.5).

# GRID Alternatives

## Background

- Non-profit organization
- CA licensed C-10 electrical contractor and C-46 solar contractor
- We install solar electric systems for low-income families with the help of volunteers, job trainees, and the families themselves.

# GRID Alternatives

## What is GRID doing now?

- Working with developers and cities to identify qualified homes
- Outreaching to qualified homeowners; enrolling them in the SASH Program
- Identifying additional grants and loans to “fill the gap”
- Recruiting and training volunteers to conduct the installations
- Installing systems
- Creating an Installer Partnership Program
