2011

Introduction to Green Building Careers

The 120-hour program includes:

- Basic Construction Principles
- Environmental Training
- Introduction to Green Building
- Energy Fundamentals
- Energy Retrofits & Efficiency
- Water Efficient Buildings & Retrofits
- Solar & Hot Water Installation & Design
- Solar Electricity Installation & Design
- Work Readiness *and* Hands-On Work Experience

This is an introductory course designed to give students a basic overview of "green" construction occupations. Once completed, students will require additional training prior to entering jobs in construction, solar, or other energy efficiency fields.

Other colleges also offering this program in 2011 & 2012
