

Accelerating the transition to a

sustainable world powered by clean energy

The Center for Sustainable Energy (CSE) is a leader in:

- ▶ Administering high impact sustainable energy market transformation programs
- ▶ Eliminating barriers to adoption through industry, consumer and policy maker engagement and education
- ▶ Extending clean energy benefits to all communities

As a mission-driven nonprofit, CSE is an objective and trusted implementation partner working with energy policymakers, regulators, public agencies and businesses of all sizes.

CSE's clients and partners benefit from our unique expertise across a wide range of clean energy sectors and our clear understanding of how various technologies scale and need to work together to lower energy costs, support resiliency and reduce carbon. Our approach works to deliver consumer choice and integrated solutions required to accelerate the sustainable energy marketplace.

Energy Programs

From capstone projects to regional and nationwide initiatives, CSE has the technical expertise and extensive experience to manage complex sustainable energy programs that span the entire program lifecycle and include a variety of stakeholders and partners.

Technical Assistance

CSE provides technical assistance to evaluate opportunities for long-term integration of sustainable energy and energy efficiency technologies. We work with schools, ports, airports, transit agencies, businesses, regional governments and planning agencies to develop feasibility analyses, energy audits and energy plans.

Training

For regional and local governments, we help build internal capacity and expertise on energy codes and standards, technologies, policy and financing. CSE also offers hands-on, classroom training and technical certifications for industry professionals and job seekers.

Your Expert Implementation Partner

At Center for Sustainable Energy, we deliver high-impact sustainable energy projects and programs. As a mission-driven nonprofit organization, our subject matter expertise and on-the-ground experience with a wide variety of sustainable energy solutions make us a trusted partner in meeting ambitious energy goals, saving money and improving the world.

What It's Like to Work with CSE

"CSE has been a great resource for state and regional policymakers in identifying and reducing barriers to adoption of critical clean energy technologies, providing independent market development services."

– Stacey Crowley,
former Director,
Nevada Governor's Office of Energy

"They are a mission-driven organization with a great deal of experience...there is no similar organization that we are aware of in the state."

– Mark J. Ferron,
former Commissioner,
California Public Utilities
