

Caret® Construction Progress Tracker

Bring EV charging projects online faster with full visibility from award to energization

A Clearer View of Every Project

Delivering EV charging projects requires coordination across utilities, permitting agencies, equipment suppliers and contractors. Without visibility, timelines slip and funding sits idle.

Caret® Construction Progress Tracker (CPT) gives program administrators near real-time visibility to identify risks, remove barriers and keep projects moving from award to energization.

Purpose-Built for EV Infrastructure

Identify and resolve bottlenecks early

Hold applicants accountable to milestones and timelines

Track utility, permitting and energization milestones

Configure workflows to your program requirements

Connect seamlessly with application and reporting systems

Use portfolio-wide data to improve program performance

Built for:

- ✓ State and local agencies
- ✓ Utilities
- ✓ Program administrators
- ✓ Private program operators

Proven at scale

Trusted to manage \$80M+ in EV infrastructure investment in California, CPT has reduced administrative time by nearly a third while improving project completion rates.

How CPT Works

Applicants report progress

Milestone updates capture permitting, utility coordination, site readiness and installation status.

Data is centralized

Project information is consolidated with role-based access for applicants and administrators.

Program teams monitor the portfolio

Administrators identify risks, address delays and track progress.

Insights improve performance

Portfolio analytics reveal recurring bottlenecks and inform future program decisions.

CPT-as-a-Service

A fully managed solution—no internal build required

- ✓ Cloud-based platform deployment
- ✓ Ongoing monitoring, maintenance and updates
- ✓ Configured to your program requirements
- ✓ Dedicated support from EVI program experts

A Trusted Partner

Center for Sustainable Energy® (CSE) is a national nonprofit that accelerates adoption of clean transportation and distributed energy through effective and equitable program design and administration. Governments, utilities and the private sector trust CSE for its data-driven and software-enabled approach, deep domain expertise and customer-focused team.
